Assembly

THE STEPPED SECTION AND THE SLOPING SECTION

- The post and frame are fastened together using metal straps manufactured of sheets 1.5 mm thick, that give it a robustness and aesthetic qualities while being discreet.
- Non-removable safety bolt system that offers a perfect technical solution with a high level of aesthetics.
- The strap model alone can provide changes in direction at different angles, slopes and stepped sections without the need for welds.

Technical features

POST

- Ø60x2mm or Ø60x3mm steel-plated posts, depending on height
- Polypropylene cap which will not degrade in harsh weather.

Assembly manual

Preparing the ground

Step 1
Mark the line of the enclosure with the help of a rope. Drill the holes for the foundation of the posts at the distance marked by the centre line.

Step 2
Cement the first post and plumb it with the help of a level.

Post and clamp assembly

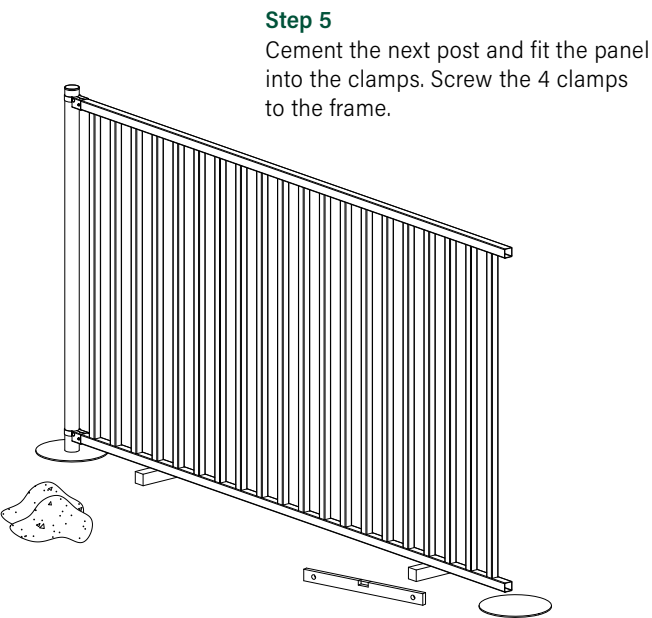

Step 3
Mount the metal clamp on the post (4 pcs. per intermediate post and 2 pcs. per end post).

Step 4
Position the frame, making sure that it is securely fastened inside the clamps.

Frame and end section assembly

Step 5
Cement the next post and fit the panel into the clamps. Screw the 4 clamps to the frame.

Step 6
Repeat the operation as many times as necessary. If base plate anchoring has been used instead of foundation anchoring, screw the base and insert the first post. Hook the panel and insert the next post.
